

# After my Vaccine Injection

When I get home I might .....

have a sore or  
heavy arm

feel achy

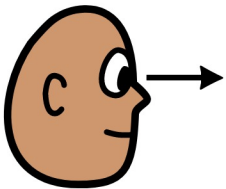

feel tired

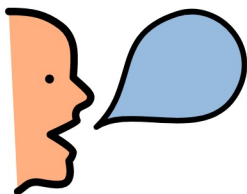

have a headache

Lots of people feel like this after the injection for 1-2 days. It is OK.

My [parent/carer] will look for signs I might feel unwell.

I can tell [parent/carer] if my arm hurts or I have a headache.

My [parent/carer] might give me some medicine to help me feel better.
