

COVID VACCINATION RESOURCES INFORMATION

We have developed some resources to

- * support young people to understand the vaccination process.
- * support young people to actively engage in having their vaccination.

You will find in this pack:

- * An information guide - How to deliver and use social stories
- * A social story - I'm having a vaccine injection
- * A one page visual to be used to explain possible side effects
- * Timeline guide and resources to guide through the process
- * Now and Next guide and template boards

You will see that some details have been kept less specific; including things like place, who will take the young person and what might be used to distract or as a reward. When you use and read the resources please personalise these for your own family and vaccine circumstances.

These resources have been made to provide general support and personalisation and differentiation may be required. Please discuss with your young person's teacher or Speech and Language Therapist as required.
